Programming project (Component 03 or 04) marking criteria – 70 marks

AO 2.2 Analysis (maximum 10 marks)				
1–2 marks	3–5 marks	6–8 marks	9–10 marks	
The candidate will have:				
 Identified some features that make the problem solvable by computational methods. Identified suitable stakeholders for the project and described them and some of their requirements. Identified some appropriate features to incorporate into their solution. Identified some features of the proposed computational solution. Identified some limitations of the proposed solution. Identified some requirements for the solution. Identified some success criteria for the proposed solution. 	 Described the features that make the problem solvable by computational methods. Identified suitable stakeholders for the project and described how they will make use of the proposed solution. Researched the problem looking at existing solutions to similar problems identifying some appropriate features to incorporate into their solution. Identified the essential features of the proposed computational solution. Identified and described some limitations of the proposed solution, Identified most requirements for the solution. Identified some measurable success criteria for the 	 Described the features that make the problem solvable by computational methods and why it is amenable to a computational approach. Identified suitable stakeholders for the project and described them and how they will make use of the proposed solution and why it is appropriate to their needs. Researched the problem in depth looking at existing solutions to similar problems identifying and describing suitable approaches based on this research. Identified and described the essential features of the proposed computational solution. Identified and explained any limitations of the proposed solution. Specified the requirements for the solution including (as appropriate) any hardware and software requirements. Identified measurable success criteria for the proposed solution. 	 Described and justified the features that make the problem solvable by computational methods, explaining why it is amenable to a computational approach. Identified suitable stakeholders for the project and described them explaining how they will make use of the proposed solution and why it is appropriate to their needs. Researched the problem in depth looking at existing solutions to similar problems, identifying and justifying suitable approaches based on this research. Identified the essential features of the proposed computational solution explaining these choices. Identified and explained with justification any limitations of the proposed solution. Specified and justified the requirements for the solution including (as appropriate) any hardware and software requirements. Identified and justified measurable success criteria for the proposed solution. 	

0 marks = no response or no response worthy of credit.

1–4 marks	5–8 marks	9–12 marks	13–15 marks			
The candidate will have:						
 Described elements of the solution using algorithms. Described some usability features to be included in the solution. Identified the key variables / data structures / classes (as appropriate to the proposed solution). Identified some test data to be used during the iterative or post development phase of the process. 	 Broken the problem down systematically into a series of smaller problems suitable for computational solutions describing the process. Defined the structure of the solution to be developed. Described the solution fully using appropriate and accurate algorithms. Described the usability features to be included in the solution. Identified the key variables / data structures / classes (as appropriate to the proposed solution) and any necessary validation. Identified the test data to be used during the iterative development of the solution. Identified any further data to be used in the post development 	 Broken the problem down systematically into a series of smaller problems suitable for computational solutions explaining the process. Defined in detail the structure of the solution to be developed. Described the solution fully using appropriate and accurate algorithms explaining how these algorithms form a complete solution to the problem. Described, explaining choices made, the usability features to be included in the solution. Identified and justified the key variables / data structures / classes (as appropriate to the proposed solution) explaining any necessary validation. Identified and justified the test data to be used during the iterative development of the solution. Identified and justified any further data to be used in the post development 	 Broken the problem down systematically into a series of smaller problems suitable for computational solutions, explaining and justifying the process. Defined in detail the structure of the solution to be developed. Described the solution fully using appropriate and accurate algorithms justifying how these algorithms form a complete solution to the problem. Described, justifying choices made, the usabilities features to be included in the solution. Identified and justified the key variables / data structures / classes (as appropriate to the proposed solution) justifying and explaining an necessary validation. Identified and justified the test data to be used during the iterative development of the solutio Identified and justified any further data to be used in the post development phase.

0 marks = no response or no response worthy of credit.

AO 3.3 Evaluation (maximum	20 marks)				
Testing to inform evaluation (maximum 5 marks)					
1 mark	2 marks	3–4 marks	5 marks		
The candidate will have:					
Provided evidence of some post development testing.	• Provided evidence of final product testing for function.	 Provided annotated evidence of post development testing for function. Provided annotated evidence for usability testing. 	 Provided annotated evidence of post development testing for function and robustne Provided annotated evidence for usability testing 		
Evaluation of solution (maxin	num 15 marks)				
1–4 marks	5–8 marks	9–12 marks	13–15 marks		
The candidate will have:			,		
 Commented on the success or failure of the solution with some reference to test data. The information is basic and communicated in an unstructured way. The information is supported by limited evidence and the relationship to the evidence may not be clear. 	 Cross referenced some of the test evidence with the success criteria and commented on the success or otherwise of the solution. Provided evidence of usability features. Identified some limitations on the solution. The information has some relevance and is presented with limited structure. The information is supported by limited evidence. 	 Used the test evidence to cross reference with the success criteria to evaluate the solution identifying whether the criteria have been met, partially met or unmet. Provided comments on how any partially or not met criteria could be addressed in further development. Provided evidence of the usability features. Considered maintenance issues and limitations of the solution. There is a line of reasoning presented with some structure. The information presented is in the most part relevant and supported by some evidence. 	 Used the test evidence to cross reference with the success criteria to evaluate the solution explain how the evidence shows that the criter has been fully, partially or not met in each case Provided comments on how any partially or unmet criteria could be addressed in further development. Provided evidence of the usability features justifying their success, partial success or failur as effective usability features. Provided comments on how any issues with partially or unmet usability features could be addressed in further development. Considered maintenance issues and limitations the solution. Described how the program could be developed to deal with limitations of potential improvements / changes. There is a well developed line of reasoning whi is clear and logically structured.
